Title: Donation to Police Treatment Centre

Executive Summary:

This paper requests a contribution of £10,000 towards the costs of the Police Treatment Centre

Decision

Resolved that:

The Chief Constable and Police and Crime Commissioner will make a joint annual contribution totalling £10,000 towards the cost of the Police Treatment Centre.

Rationale

The Police Treatment Centre provides rehabilitation services to Police Officers across England and Wales. The Police Treatment Centres is a registered charity supported by voluntary donations from the police family primarily in the northern forces of England and Wales, Scotland and Northern Ireland, but also from British Transport Police, the Civil Nuclear Constabulary and the Ministry of Defence Police.

The charity provides two Treatment Centres where serving and retired police officers can receive recuperation and treatment following an illness or injury with the aim of assisting their return to better health. The Centres are St Andrews, in Harrogate, North Yorkshire, and Castlebrae in Auchterarder, Perthshire.

Almost 4000 serving and retired officers attend the Treatment Centres each year

and most receive intensive physiotherapy. Others seek support with stress-related conditions and some attend for reasons of respite or to recuperate following an illness or operation.

It provides a direct benefit to employers, who benefit from the fact that Police Officers are able to return to work sooner and become deployable as a direct result of the physical and psychological support provided by the Centre.

Other police forces including Nottinghamshire, West Yorkshire and Humberside already make a contribution to support the work of the Police Treatment Centre for these reasons.

It is proposed that the Chief Constable for Derbyshire and the Police and Crime Commissioner for Derbyshire jointly make a contribution of £10,000 per annum towards the cost of the Police Treatment Centre. This is fully supported by the Police and Crime Commissioner for Derbyshire.

Declaration
