

AWS Quarterly Report April - June 2026

Overview

This report is to provide information about visits undertaken by Animal Welfare Scheme Visitors (AWS) between 1st April and 30th June 2026.

Visits

For information, the decision has been made to record the AWS from year start to year end rather than in line with the financial year. We will, however, continue to publish quarterly reports.

In 2025, there was one dog, that was not seen. These have been marked on the list below with '*' and the volunteers have been asked to prioritise seeing this dog during visits in 2026.

For the second quarter of 2026, report forms have been received for a total of 3 visits. Highlighted in green below, are the dogs that were visited by AWS Volunteers in quarter 2.

Examples of good practise

- Given the excessive heat over the last few days (23c on the day of the visit but 28-32c over the last few days), the kennels offer enough shelter to allow the dogs to be comfortable and have plenty of water. When the kennel staff were asked if any considerations/alteration had been made walks have been shortened and not in peak heat times to reduce the risk of heat stroke.
- All kennels were clean with plenty of fresh water available. Kennel policies and procedures have now been reviewed and re-issued. The visit was facilitated well by kennel staff and all AWS requirements are being met.

Causes of concern

No causes of concern were raised in quarter 2 by the volunteers.

Conclusion

- 10 dogs were visited last quarter
- The feedback received from the volunteers in quarter 2 was very positive.
